Aneroid barometers are often broken by mishandling or corrosion and can be restored to life. If the front glass is damaged we can make new beveled glass parts and install the pointer hands. The mechanisms can be repaired and new vacuum capsules installed if necessary. Again, polishing is available.

Set the indicator hand on your barometer. Locate the small adjusting screw on the back of your barometer. With a small screwdriver, turn the adjusting screw to move the hand to your location's current pressure. Watch the face of the dial and stop turning the screwdriver when the hand reaches the appropriate reading.

This Airguide hygrometer probably dates from the 1950s. It uses a metal-paper sensor coil directly connected to the indicator needle. The coil consists of a salt-impregnated paper strip attached to a metal coil. As the paper strip absorbs or releases moisture it causes the metal coil to wind/unwind, much like a bimetallic thermometer coil.
