Communication in nursing Nurse and
patient communication begin at first
contact; at the initial moment of patient
care. This communication lasts the
duration of the care cycle. For the most
benefit, the patient must feel
comfortable, which requires a peaceful
and private environment (as much as is
allowed) and confidentiality.

Communication in Nursing - What Role Does Technology Play?

A 2014 research paper, Communication in Nursing Practice, found that nurses who display courtesy, kindness and security to their patients — through both their actions and words — are generally more successful in establishing a good rapport. The paper suggested that nurses must go beyond simply demonstrating these niceties though.
