deficiencies can adversely impact animal performance. Find out more about the various functions of each trace mineral, as well as signs of a trace mineral deficiency.

Animal Nutrients | Trace Mineral Functions and ...

Vitamins are organic compounds made by plants and animals which can be broken down by heat, acid or air. On the other hand, minerals are inorganic, exist in soil or water and cannot be broken down.

Micronutrients: Types, Functions, Benefits and More

Minerals are inorganic nutrients, usually required in small amounts from less than 1 to 2500 mg per day, depending on the mineral. As with vitamins and other essential food nutrients, mineral requirements vary with animal species. For example, humans and other vertebrates need large amounts of calcium
